

## **University Outreach Program to Promote Under Represented Subjects**

During our recent educational outreach, we had the opportunity to visit the Read Foundation High School in Rawalakot, Azad Jammu and Kashmir. Our visit was primarily focused on engaging with students at the matric and intermediate levels, introducing them to the diverse academic opportunities available at our university. Our team, comprised of faculty and student ambassadors, organized interactive sessions and presentations, showcasing the dynamic and challenging fields of study our institution offers. We emphasized the importance of exploring less traditional and underrepresented disciplines, particularly highlighting our university's programs in BS Engineering and Big Technology. These sessions were designed to inspire and inform students about the unique career paths and prospects these fields offer, encouraging them to consider these as viable and exciting options for their higher education.

In the second part of our visit, we facilitated detailed discussions and Q&A sessions, allowing students to delve deeper into the specifics of these programs. Our faculty members shared insights into the curriculum, practical learning opportunities, and the future scope in these industries. Additionally, current university students who accompanied us shared their personal experiences, challenges, and triumphs within these fields, offering a relatable perspective to the high school students. We also provided guidance on the admission process, scholarships, and support systems available at our university to assist students from diverse backgrounds. The visit concluded with a tour of our interactive booths, where students engaged in hands-on activities and demonstrations, further cementing their interest and curiosity in the subjects of BS Engineering and Big Technology. Our initiative was a step towards bridging the gap between high school education and higher learning, particularly in areas that are pivotal to the technological and engineering advancements of our society.

Seminar at High School Read Foundation Rawalakot
