

Energy Consumption at the University of Poonch Rawalakot (UPR) in 2022

In the span of January to December 2022, the University of Poonch Rawalakot consumed a total of 763 Giga Joules (equivalent to 211,922 Watts). This calculation encompassed energy usage across all academic and non-academic blocks, with a comprehensive tabulated breakdown detailing the consumption in each area before determining the overall total.

Low Carbon Energy Utilization at the University of Poonch Rawalakot (UPR) in 2022

The primary source of the total energy, amounting to 763 Giga Joules, is derived from hydropower. Overall the hydropower contribution is 100 %.
