

Cooperative Planning for Climate Change Disasters

Cooperative planning for climate change disasters involves collaborating with different stakeholders to develop effective strategies to mitigate and respond to the impacts of climate change. Climate change is a complex issue so multi-faceted and collaborative approaches are required to address.

Universities can contribute to cooperative planning for climate change disasters by formulating a climate action plan. It is a comprehensive document that outlines the strategies and policies of university to reduce greenhouse gases. The plan includes several strategies, such as use of renewable energy, waste management, energy efficiency, sustainable transportation and increase of vegetation.

The University of Poonch Rawalakot (UPR) has developed its **Climate Action Plan** and this plan was shared with local government and community groups and has public access at university web. This plan develops a coordinated approach to address climate change in the local area and by sharing this plan universities may provide valuable information and guidelines to other institutions, local community and government. Universities can also collaborate with community organizations and local governments to identify populations and vulnerable areas and create efficient plans to mitigate the effects of climate change. By using a cooperative planning approach, it is possible to make sure that all parties are aiming for the same outcome and that resources and efforts are being used effectively.

In general, cooperative planning for climate change disasters entails working together with various stakeholders, such as academic institutions, local governments, and community organizations, to create efficient plans for reducing the effects of climate change and adapting to them. One way that universities can support this cooperative strategy is by creating a Climate Action Plan and distributing it to regional stakeholders.

The climate action plan of UPR

The climate action plan of UPR is given at link:

<https://upr.edu.pk/storage/uploads/blogs/655f2b046ea52-Climate%20Action%20Plan%20%20University%20of%20Poonch-sdg%2013.pdf>

The climate action plan was shared with Environmental Protection Agency (EPA) Muzaffarabad, Azad Jammu and Kashmir.
